

Shrikanth Narayanaswamy Chandrasekaran

 <https://snaraya7.github.io/>

 snaraya7@ncsu.edu or nc.shrikanth@gmail.com

 Raleigh, North Carolina, USA

I am Shrikanth a Ph.D. candidate in Computer Science at NC State University with **10 years of industry experience**. My research interest includes Software Engineering and Machine Learning.

EDUCATION

2017 - **Ph.D. Candidate in Computer Science** at North Carolina State University (*Graduating* - December 2021)

2004 – 2008: 4 year full-time **Bachelor of Engineering in Electronics and Communication**, Saveetha Engineering College, affiliated to Anna University – Chennai

INDUSTRY EMPLOYMENT HISTORY (2008 - current)

Summer 2021 **Microsoft, USA**

Role: Research Intern | **Domain:** Software Engineering Research

Developer Satisfaction (productivity): Perform large-scale data analysis on software engineers' feedback about their day-to-day work and on hundreds of software repositories to offer actionable recommendations (through machine learning models) to improve developer satisfaction across a large unit within Microsoft.

Summer 2020 **Fujitsu Laboratories of America, USA**

Role: Research Intern | **Domain:** Software Engineering Research

Low code platform: Improved deep learning-based 'Code Retrieval' models (using CodeBERT & CodeSearchNet deep learning models) that catalyze developer productivity.

2014 – 2017 **Accenture Labs, India (Full-time)**

Role: Technology R&D Specialist | **Domain:** Software Engineering Research

- Mentored both interns (on data science tasks) and software developers (for product development).
- Presented the work to leadership on a quarterly basis.
- Research Project #1: Crowdsourcing - Performed large scale data analysis to find obstacles for enterprises to crowdsource software development
- Research Project #2: Log Analysis - Analyzed voluminous incident tickets and their associated log files of a supermarket chain to prescribe solutions to minimize incident resolution time.
- Research Project #3: Requirements Visualization - Built Eclipse IDE plugins for visual requirements and component reuse driven rapid application composition.
- *Recognized for outstanding contributions (patents and publications)*

2011 – 2014 **ABB India Limited, Bangalore India (Full-time)**

Role: Software Engineer | Software Development, LV Systems R&D | **Domain:** Electrical

- Project #1: Product Development - Managed the software life-cycle of a standalone Low voltage switchgear configuration and reporting product.
- Project #2: Trained a team of software engineers to transition their skills from .NET to Java-based technologies.
- *Star Employee for a quarter for meeting a short deadline*

2008 – 2011 **Infosys Limited, Chennai India (Full-time)**

Role: Senior Systems Engineer | **Domain:** Banking

- Project #1: Product Finmapper - Single-handedly embedded the entire stack (both front and back-end) of a standalone banking product into an Eclipse IDE environment.
 - Integration was done to improve the productivity of senior integration engineers at the client site.

Shrikanth Narayanaswamy Chandrasekaran

 <https://snaraya7.github.io/>

 snaraya7@ncsu.edu or nc.shrikanth@gmail.com

 Raleigh, North Carolina, USA

- *Certifications: Sun Certified Java Programmer and Sun Certified Web Component Developer*
- *Finacle on the spot award for learning a niche skillset and integrating an entire product onto an IDE as a newbie.*

SKILLS

- ❖ *Programming:* Java (SCJP and SCWCD certified) & Python. *Fundamentals:* Data Structures, Algorithms, Compilers, Object-oriented analysis, and design.
- ❖ *Statistics:* Hypotheses testing, effect size, analysis of distributions, etc
- ❖ *Machine Learning:* Predictive/Estimate modeling, Weka data mining, scikit-learn, Deep learning (Tensorflow, CNN & RNN) Carrot2, ELK, and OPEN NLP. *Visualization:* Plotly, MATLAB, R, etc.
- ❖ *Front-End:* Java Swing, Eclipse Plugin development, and HTML-CSS. *Database:* RDBMS (MySQL & MariaDB) and Kusto (Microsoft).
- ❖ *Distributed computing:* Python multiprocessing on High-Performance computing
- ❖ *Operation Systems:* Windows, Unix, and Linux
- ❖ *Methodologies:* Waterfall, Agile and Test-driven development (DevOps tools)

GRANTED PATENTS

1. Method and system for visual requirements and component reuse driven rapid application composition
2. Incident Prediction and Prevention
3. Generating a Test Script Execution Order

RESEARCH (Research Assistant, North Carolina State University) 2017 to present

Interest: Software Engineering and Machine Learning | Focus area: Software Quality Assurance | **Lab:** RAISE(<http://ai4se.net/>)
Advisor: Dr.Tim Menzies (<http://menzies.us/>) Our recent empirical study confirms that “96% of the time, we do not want and we do not need data-hungry methods” (refer to publication [1] below).

Other research areas: Code Retrieval, Crowdsourcing, Test case prioritization, and Software Maintenance.
